Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Brien et al in view of Black.

The device and method as claimed is substantially disclosed by O'Brien et al with a marking scriber having an end with a roller 60 and a scribe unit spaced therefrom with a scribe member 72 held by the scribe unit 80, but lacks the adjustable scribe member being biased into contact with the marking surface and the specific method steps of using the marker with pipe joint methods. Black teaches using a biased 17a marking member 17 that remains in contact with the workpiece and the method steps claimed for marking pipe junctions. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to add a biasing means to the scribe of O'Brien et al as taught by Black to maintain the marking member in contact with the workpiece. It also would have been obvious to one of ordinary skill in the art at the time the invention was made to use the device of the combination of O'Brien et al and Black together as taught by Black to mark a pipe in making a pipe junction.

Allowable Subject Matter

3. Claims 1, 2, 6, and 7 are allowed.
